

Proceedings of the Indian Academy of Sciences

(Chemical Sciences)

Volume 97, 1986

CONTENTS

Inorganic and Analytical

- Inorganic complexation of nickel and cobalt in natural waters
Anil Kumar 1-7
- A ruthenium(II) complex of *bis*(1-pyrazolyl) borate
M M Taqui Khan, K Veera Reddy, R C Bhardwaj and H C Bajaj 9-11
- Some lanthanide metal complexes of *n*-isonicotinamidosalicylamidine
T R Rao, I A Khan and R C Aggarwal 13-18
- Mixed ligand complexes of *bis*(acetylacetonato) nickel(II) and cobalt(II) with N and N,N'-substituted thioureas
G L Tembe, S B Kokatnur and A S R Murty 19-24
- Structural studies of amino acid complexes—I EXAFS study of glutamic acid complex of copper
C K Bhaskare and S Y Kulkarni 25-32
- Preparation, characterization and thermal analysis of rare earth and uranyl hydrazinecarboxylate derivatives
G V Mahesh, P Ravindranathan and K C Patil 117-123
- $\text{RuCl}_2(\text{PPh}_3)_3$ catalysed oxidation of secondary alcohols with N-methylmorpholine N-oxide
K Vijayasri, J Rajaram and J C Kuriacose 125-132
- Effect of dielectric constant of various mixed aqueous solvent on the proton-ligand and metal-ligand formation constants of N-methylisatin β -amidinohydrazone
K Sarkar and B S Garg 133-139
- Synthesis and spectral studies of tin(IV) complexes with Schiff bases derived from sulpha drugs
Anil Varshney and J P Tandon 141-146
- Water insoluble polyacrylamide XII: Polychelates based on poly (N-methacryloyl-*m*-amino benzoic acid)
Kishore Patel, Trishar Desai and Bhikhu Suthar 147-152
- 2-Hydroxy-1-naphthaldehyde guanyldrazone as analytical reagent for spectrophotometric estimation of vanadium
F Salinas, J J Berzas Nevado and A Espinosa 153-157

Synthesis, identification and analytical properties of the 2-pyrididenimino benzohydroxamic acid

F Salinas, M Jiménez-Arrabal and I Durán Merás 159–166

Study of ternary complexes of substituted catechols and catecholamines

P K Bhattacharya, N A Emanuel and N D Kulkarni 529–534

Exchange reactions of copper complexes with amines

M N Patel and K B Patel 535–541

Influence of electrostatic effect on the stability of mixed-ligand complexes: Uranyl-complexone-phenol/phenolic acid ternary systems

Anushree Samanta, S N Limaye and M C Saxena 543–546

Instrumentation

Design and fabrication of an ultraviolet photoelectron spectrometer for the study of free molecules

V Jayaram and M S Hegde 617–626

Organic

^{13}C NMR substituent induced chemical shifts in the side-chain carbons of α,β -unsaturated sulphones

C Sreenivasan, P K Ganesan, A Shanmugasundaram and N Arumugam 33–39

Photo-Fries reaction of 1-naphthyl cinnamate

T Jayachandran, T Manimaran and V T Ramakrishnan 41–45

Reaction of ethyl bromoacetate with substituted naphthoate ions

K Rajasekaran and C Gnanasekaran 47–53

Kinetics of the reaction of alkyl bromides with nucleophiles containing nitrogen atoms

T Janardhan Rao, G Punnaiah and E V Sundaram 55–61

Semecarpufflavanone—a new biflavanone from *Semecarpus anacardium* Linn.

S S N Murthy 63–69

Solid phase synthesis of the signal sequence of *E. coli* alkaline phosphatase

G Laxma Reddy and R Nagaraj 71–75

Abietane diterpene quinones and a new diterpene epoxide from *Salvia moorcraftiana*

Beena Bakshi, N B Mulchandani and J Shankar 167–170

^{13}C NMR Data of flavanol methyl ethers of *Solanum pubescens*

G N Krishna Kumari, L Jagan Mohan Rao and N S Prakasa Rao 171–176

Molecular and crystal structure of 1-hydroxy-2-methyl-11-methylene-tri-cyclo (5.3.1.0) ^{2,7} -undecan-5-one, C ₁₃ O ₂ H ₁₈	<i>S Krishnaswamy and Vasantha Patabhi</i>	547-553
--	--	---------

Mechanism of the oxidation of alkyl aryl and diphenyl sulfoxides by peroxomonosulphate	<i>R Suthakaran, P Subramanian and C Srinivasan</i>	555-563
--	---	---------

Physical and Theoretical

Enthalpies of complex formation of dibutyl and tributyl amines with isomeric butanols	<i>Shirish D Pradhan and Gopal Pathak</i>	77-81
---	---	-------

Electronic and vibrational spectra of 2,4,6-trichloro- and 6-chloro-2,4-dimethoxypyrimidine	<i>S L Srivastava, M Prasad and Ranjeet Singh</i>	83-90
---	---	-------

QSAR studies on estrogen receptor binding affinity of 2-phenylindoles using first-order valence molecular connectivity	<i>P Singh</i>	91-95
--	----------------	-------

Infrared and Raman spectra of 2,4-dimethylaniline	<i>A R Shukla, C M Pathak, N G Dongre, B P Asthana and Jacob Shamir</i>	97-115
---	---	--------

ESR Bonding parameter studies of single and mixed ligand complexes of copper(II)	<i>Y Anjaneyulu, N V S Rao, R Prabhakara Rao and V G K M Pisipati</i>	177-184
--	---	---------

Reaction of 2-hydrazino-4-methyl-6-substituted quinones with ethylacetoacetate: A structural reinvestigation	<i>Radhe K Vaid and Shiv P Singh</i>	185-189
--	--------------------------------------	---------

Vibrational-rotational (ν - j) levels of HD ⁺ evaluated in the adiabatic approximation for the electronic ground state (1 σ_g)	<i>R S Bhattacharjee, R P Saxena, P K Srivastava and K V Sane</i>	191-207
---	---	---------

Electron impact ionization of amines using crossed electron-molecular beams	<i>S V Krishna Kumar and D Mathur</i>	565-572
---	---------------------------------------	---------

Reaction of the phosphate radical with amines—A flash photolysis study	<i>P Subramanian, V Ramakrishnan, J Rajaram and J C Kuriacose</i>	573-580
--	---	---------

Underpotential deposition studies of copper on glassy carbon	<i>S Jaya, T Prasada Rao and G Prabhakara Rao</i>	581-586
--	---	---------

Stereochemistry and structural phase transition of Cu(II) complexes containing orthophosphate ions and pyridine/picoline	<i>M S Sastry and M D Sastry</i>	587-592
--	----------------------------------	---------

Infrared and Raman spectra of vicinally trisubstituted 2-methyl 3-chloroaniline and 2-methyl-6-chloroaniline	<i>A R Shukla, C M Pathak, N G Dongre, B P Asthana and Jacob Shamir</i>	593-600
--	---	---------

- SCE Perturbation calculations on metalloporphyrins
K K Bhattacharjee, J Subramanian, D P Santry and J H Fuhrhop 601-606
- Exchange studies of sulphosalicylic acid in amberlite IRA 401 Cl anion exchange resin
Nooman A Khalaf and G S Natarajan 607-615
- Special issue dedicated to Professor K S G Doss on his eightieth birthday**
- Solvation model for inner-sphere nuclear reorganization in the photo-ionization of univalent anions in solution
Paul Delahay and Andrew Dziedzic 221-231
- Proton and hydrogen transfer reactions in solution
P P Schmidt 233-265
- New theories for the electric double layer at a metal/electrolyte solution interface
Ezequiel Levia and Wolfgang Schmickler 267-296
- Calculation of the density profile of a system of hard spheres near a hard wall using the Henderson-Plischke and related approximations
Douglas Henderson and Michael Plischke 297-305
- Spectral functions and Green's functions: A critique
A K Mishra and S K Rangarajan 307-331
- The adsorption of D-(+)-xylose at the mercury-water interface
Roger Parsons and Robert Peat 333-347
- Polymer films on electrodes. 21. Electrochemical behaviour of tetramethyl-tetraselenafulvalene incorporated into a Nafion-coated electrode
Roger D Moulton, Allen J Bard and Jack M Williams 349-357
- High performance electrode materials for the hydrogen evolution reaction from alkaline media
B V Tilak, A C Ramamurthy and B E Conway 359-393
- Electrochemical reduction of 2-nitrobenzidine in methanol-water mixtures
S Aravamuthan, M S Sashidar, C Kalidas and C S Venkatachalam 395-401
- Electrochemical reduction of some benzophenones in molten acetamide at 85°C
R Saraswathi and R Narayan 403-416
- Cyclic voltametric studies of dioxygen-bridged dinuclear cobalt(II) complexes
S Ilangoan and P Natarajan 417-430
- The translocation of cobalt dicarbamide anions across a lipid bilayer membrane: the effect of solution resistance
Robert J Atwell Jr, Ramamurthy Sridharan and Robert de Levie 431-436

Peak sampling—a new technique for eliminating charging current in AC polarography
Aithu Poojary and S R Rajagopalan 437–448

Use of programmed time-potential inputs in anodic stripping voltammetry with *in situ* sodium amalgamation
G Prabhakara Rao and A Varadharaj 449–455

In situ resistance measurement of a conducting polymer electrode
M Gholamian, T N Suresh Kumar and A Q Contractor 457–464

Applications of exponential relaxation methods for corrosion studies and corrosion rate measurement
V Lakshminarayanan and S R Rajagopalan 465–477

Electrobioluminescence—a novel method for understanding bioluminescent mechanisms
K S V Santhanam 479–494

Corrosion of austenite stainless steel in aqueous environments
J B Gnanamoorthy 495–511

Fuel cells: problems and prospects
A K Shukla, K V Ramesh and A M Kannan 513–528

Rapid Communications

Solution of difficult crystal structures: New, simple, economic and time saving approaches
S S Tavale and T N Guru Row 209–211

Reactions of halogens with 2,2'-azinobis-(3-ethylbenzothiazole-6-sulphonate) stopped-flow kinetics of formation of radical cations and dications
P Maruthamuthu, L Venkatasubramanian and P Dharmalingam 213–218

Magnetic properties of $\text{Ca}_2\text{Fe}_{2-x}\text{Mn}_x\text{O}_5^+$
A K Ganguli and J Gopalakrishnan 627–630

High T_c superconductivity in oxides derived from $\text{La}_{1.8}\text{Sr}_{0.2}\text{CuO}_4$
P Ganguly and C N R Rao 631–633

Subject Index 635–643

Author Index 643–647
